

Socket Serial Newsletter

October 2007

Welcome to the very first edition of the Socket Serial Newsletter. A special thanks to everyone who participated in our recent serial products survey. Prizes have already been awarded to our three lucky winners

Survey says....you like us! - Respondents in our survey mentioned Socket SIO cards more often than any other when asked to name their preferred brand.

Core Duo support - Did you know that Core Duo drivers are now available for these SIO cards? Serial I/O CF Card, Serial I/O PC Card, Dual Serial I/O PC Card, Quad Serial I/O PC Card.

Please see <http://www.socketmobile.com/products/device-connectivity/serial/>

Vista drivers are coming - We thought you would like to know... we're hard at work on signed Windows Vista™ drivers for our serial I/O cards. Start checking our website for the download in late October, 2007.

Website changes are coming - Over the next few months we're going to be making the serial IO section of our website more accessible and informative as a service to our customers who still depend on serial data communications. You will soon be able to use the shortcut www.socketserial.com to go directly to our serial I/O products.

More on Socket Mobile - Socket Mobile makes mobility computing and productivity work. In addition to our great serial I/O products, we are a one-stop supplier of mobile computing hardware systems including a handheld mobile computer and one of the most complete portfolios of mobile data collection and networking connectivity peripherals. We also offer OEM partner solutions and software development programs. Socket is headquartered in Newark, Calif. and can be reached at 510-933-3000 or www.socketmobile.com.

Regards,
Duane Cowgill
